

# BALLISTA GREYJOY

INSTRUCTION MANUAL

MECHANICAL  
3D PUZZLE

BALISTA GREYJOY  
TARGET FIGURINES  
BALL-SHAPED BULLET  
BATTLEFIELD PANORAMA

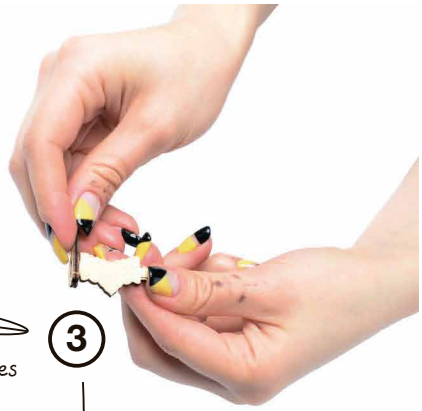

WE  
DO NOT  
SOW

1

2

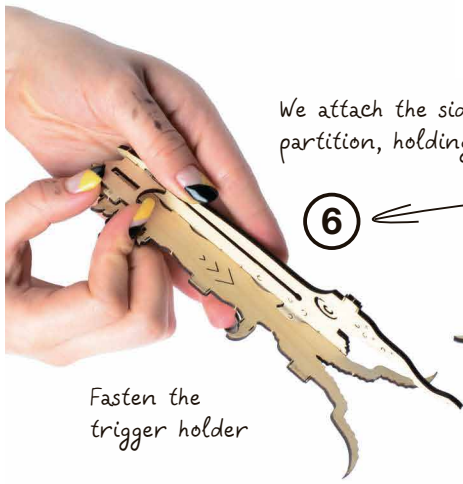

3

We fasten the sides to the bottom partition, look carefully at the places mounts and sides of parts to install them properly

the places of attachment need to cut with a knife, preferably on both sides

Locks at connection points parts come in very tight, so here you don't need to hurry. For easy attachment, locks can be sanded

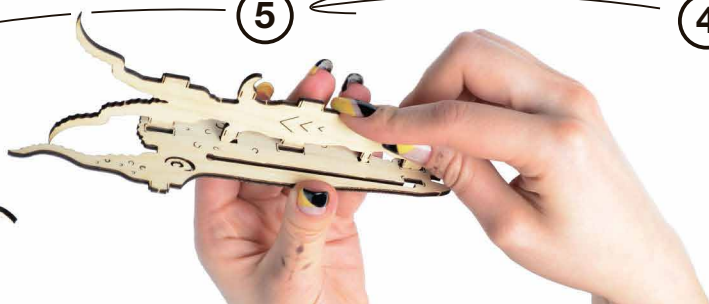

6

Fasten the trigger holder

We attach the side of the case to the partition, holding the connection points

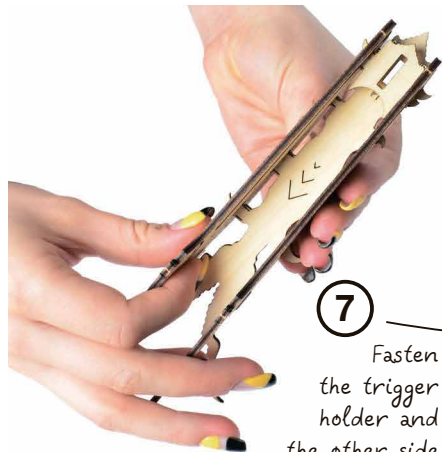

Attach lateral elements to the tail decor

5

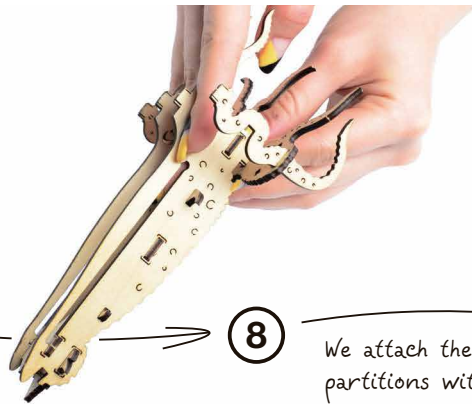

4

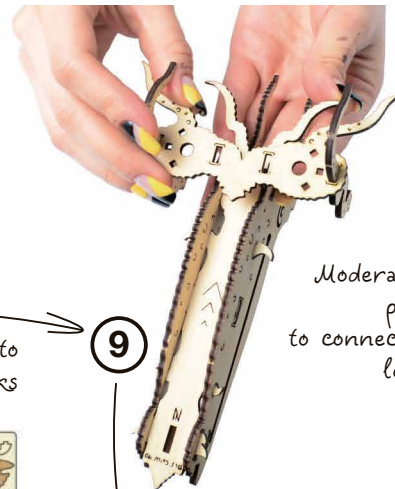

7

Fasten the trigger holder and the other side of the case to the partition

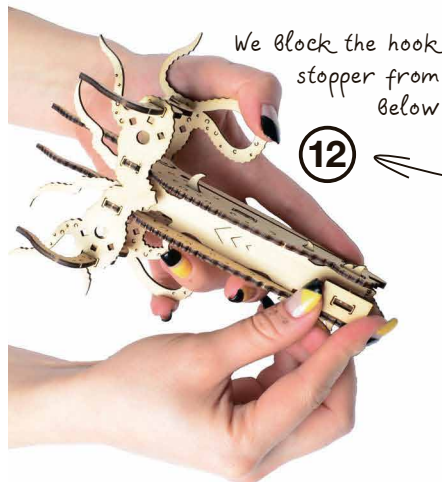

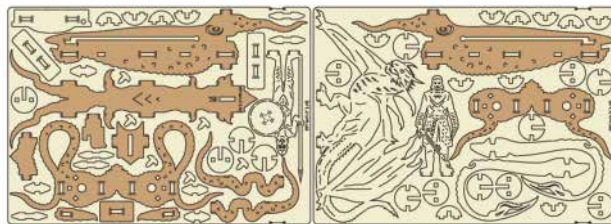

8

We attach the case to partitions with racks

9

Moderately press to connecting locks

12

We block the hook stopper from below

11

Insert tail hook in holder from above

10

The upper partition is attached to the Ballista Body

13

The ends of twine fry by the lighter

14

Wrap the twine 4 times around the holder and we make ends meet

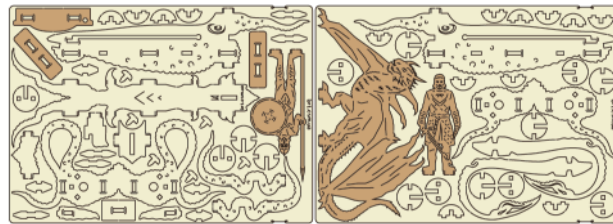

15

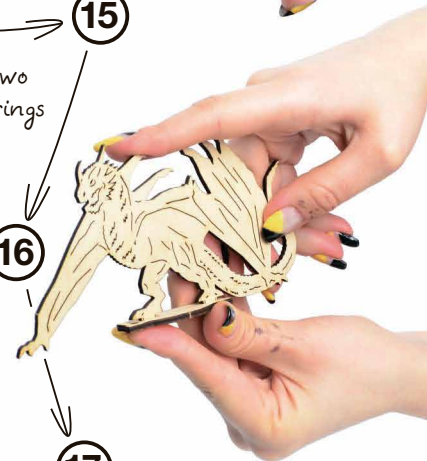

We make two of twine rings

Cut off two 60cm pieces twine

We promote twine through hole so that it started coming out at to you

16

17

Target figures are fasten on the supports

19

Each figure has its own individual stand

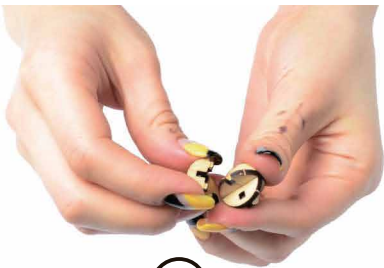

18

20

21

22

Each Bullet is blended with four pieces, all in a set there are 6 Bullets

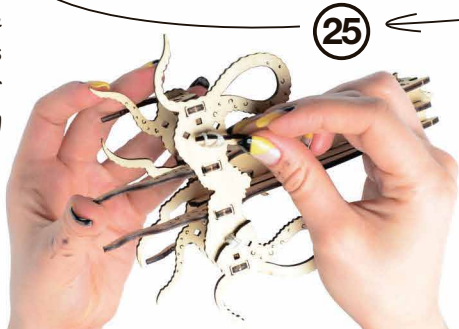

26

Insert the Ballista's shoulder, splitting the twine evenly, and then promote a sealant

We repeat the same actions with another twine ring

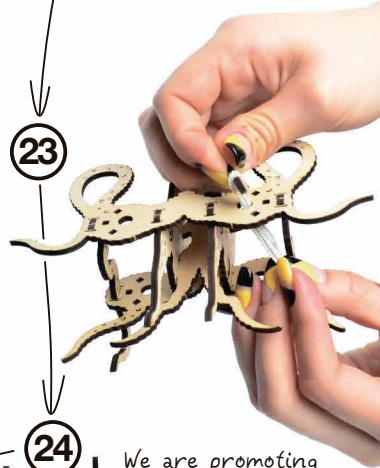

Now push the ring through the top hole blocking with another tensioning stopper

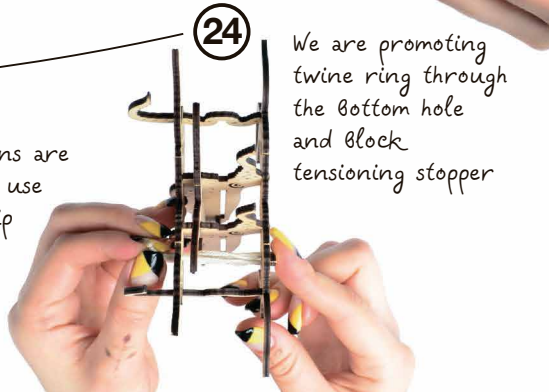

25

For relief these actions are possible to use a paper clip

23

24

We are promoting twine ring through the bottom hole and block tensioning stopper

27

Insert another shoulder

We tie the twine to shoulders pushing him through the grooves in the housing

28

The seals must be mounted on top and from below and close to the shoulder Ballista

29

Wrap the top and lower stoppers in the right direction, controlling force of tension

32

Insert blocks for stoppers into the required hole - the opposite of parties promotion

31

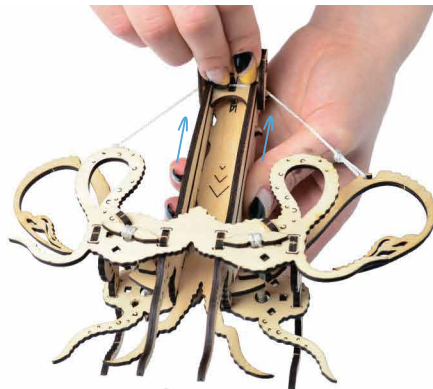

30

33

Charge the ballista by special detail

34

After charging this part used as an element of decor, and put on its tail

35

And then it's simple aim at the target and click on the hook)

# BALLISTA GREYJOY

Mechanical 3D-puzzle based on the world-famous saga "Song of Ice and Flame" and the series "The Game of the Thrones".

This is a true military technique in miniature. Designed in fantasy style. It shoots with bullets and works at the expense of tension forces when unlocking blocks. Puzzle made of the natural wood.

Releases 1 to 3 bullets at a time! Shooting at a distance of up to 10 meters, with its compact size.

Bullets are included. If you desired, they can be replaced by any other "ammunition" of appropriate size - for example, paper balls.

Suitable for children aged up of 10 years. Can be collected for 40-60 minutes.

Before assembling, remove the parts from the workpiece using a conventional clerical knife. Each element is already cut out on the laser equipment circuit - just pull it out and draw up the pattern.

A wooden Ballista is created for anyone who interested in historical weapons. It allows you to understand the basic principles of physics and ballistics. The assembly process itself is no less interesting as a shooting of the fantasy Ballista. A nice gift for both children and adults.

Also included are the target figurines, which will immediately recognize by the true fans of the saga)

The set also has a thematic panorama, which will help plunge into the atmosphere of battle)

Everything is like a real battlefield. So, rather, charge and shoot!

The peculiarity of the material is such that it can easily be painted even with colored pencils.

Make your Ballista and characters original and individual)

Difficulty: easy

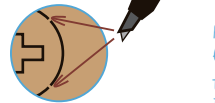

Collection time: 40-60 min

Number of components: 64 pcs. (3 of them are spare)

The size of the workpiece with parts: 210 \* 150 \* 3 mm (2pcs)

The size of the finished ballista: 205 \* 190 \* 60 mm
